SUMMARY

Full-stack web developer leveraging mainframe background to build a more intuitive user experience on the web. Certificate in full-stack development at The University of Adelaide, with newly developed skills in HTML, JavaScript, CSS, React.js, Node.js, Express.js, MySQL, OOP, and responsive web design. Known as an innovative problem solver passionate about developing apps, with a focus on web design and development. With each project, I aim to best engage my audience for an impactful user experience. I worked on a team of four to develop a webpage Day maker app that makes the user's day better with some news and jokes with the categories the user chooses. I am excited to leverage my skills as part of a fast-paced, quality-driven team to build better experiences on the web.
